Snapshot of October 29, 2026. This dossier describes the four repositories as they stood that day; the projects have moved on since, and the repositories are the authority. Underlined links lead to the sources, frozen at their state of that day.

TIMELINE

A month of open workshop

From September 20 to October 29, 2026, four repositories move forward in parallel. A few days hold everything: October 7, 10 and 20. Here is the month, project by project, day by day.

The month on one timeline

Three pivotal days. On October 7, gnostral.rs closes its foundational research and in.gnu6 completes its mandate. On the 10th, three repositories move at once. On the 20th, Calix ships six releases.

Day by day

DATE	REPOSITORY	WHAT HAPPENS
September 20	Calix	First release, v0.1.0, still under the name Shelly.
October 5	gnosix	First public repository, with a CI contract from day one.
October 6	in.gnu6	The quest log is ratified; ten milestones are ratified the same day.
October 7	gnostral.rs	Quests Q-001 to Q-008 closed; versions 0.1 to 0.8 published.
October 7	in.gnu6	Six more milestones: the mandate, sixteen milestones, is complete.
October 8–9	in.gnu6	Native-rendering research (GPU-05).
October 9	gnostral.rs	The partial Q-009 track is dated and kept as is.
October 10	gnosix	From the GPL to the MIT licence.
October 10	gnostral.rs	The native proof chain, from Q-010 to Q-013-C.
October 10	in.gnu6	The CUDA-05F protocol, a 125 s endurance run, the repository made public.
October 12	gnosix	Wayland qualification: click, two screens, drag and drop.
October 20	Calix	Six releases, v0.2.0 to v0.2.5: the Calix name, notifications, fixes, the mark, navigation.
October 21	gnosix	First public pre-release, v26.11-rc1 « Ardoise ».
October 21	Calix	v0.3.0, the release that measured space.
October 21	gnostral.rs	A research watch on upstream systems.

DATE	REPOSITORY	WHAT HAPPENS
October 22	Calix	v0.3.1, the release that runs on the machine.
October 27	gnosix	CI contract at 38/38 after merging the pre-release; a default desktop profile.
October 28	Calix	Latest evidence before the snapshot: the release document has a single writer.
October 29	prologue	This dossier’s snapshot: the four repositories, checked and frozen as they stood that day.
